PROFILE

Mobile and web developer with over 2 years of experience. 6 Flutter applications (Android and iOS) published and maintained in production, plus web development in Angular / Spring Boot and ReactJS gained in industry. Backend work in Node.js, NestJS and Express: REST API design, data modelling and role-based security. Integration of AI features in mobile environments (text analysis and extraction). Looking for a new challenge in mobile or web development, remote or on-site.

TECHNICAL SKILLS

Mobile: Flutter, Dart, Swift, SwiftUI, UIKit, Kotlin, Core ML, Vision Kit, CoreData, Firebase Cloud Messaging, App Store Connect and Google Play Store releases
Web: Angular, ReactJS, JavaScript, TypeScript, HTML, CSS
Backend: Node.js, NestJS, Express, Spring Boot, Spring Security, REST APIs, WebSocket
Databases: PostgreSQL, MongoDB, Firebase / Firestore
Applied AI: On-device AI model integration, OCR and text extraction, TensorFlow
DevOps & tools: Git, GitLab, GitHub, CI/CD, Jenkins, Docker, Grafana, Prometheus, Jira
Methods: Agile Scrum, Clean Architecture, MVVM, code review, automated testing

PROFESSIONAL EXPERIENCE

Mobile Developer — Smart Conseil

Tunis, Tunisia | April 2025 – April 2026 | 1 year 1 months

- Development of cross-platform Flutter applications (Android and iOS) with embedded AI features, for the education sector.
- Release and publication of 6 applications on the Google Play Store: release configuration, version management and post-release monitoring.
- REST API integration and close work with backend teams on data modelling and API contracts.
- Design of new feature modules, corrective and evolutive maintenance, performance optimisation; agile collaboration with design and backend teams (Git / GitLab, code reviews).

Freelance Mobile Developer — Health 360

Tunis, Tunisia | November 2024 – April 2025 | 6 months

- Development of a health management mobile application on iOS (SwiftUI) and Android, from scoping to delivery.
- AI integration for text extraction and analysis from images (Vision Kit, OCR).
- Development of the NestJS / MongoDB backend and REST API integration.

iOS & Backend Developer — Orange Tunisie

Tunis, Tunisia | February 2024 – August 2024 | Final-year internship, 7 months

- Development of the Node.js / MongoDB backend: REST APIs, data modelling and response times optimised to under 200 ms.
- Native iOS (Swift) event management application for the 7 Orange Digital Center Clubs, with Firebase Cloud Messaging push notifications.
- Clean Architecture and Scrum sprints within a team of 6.

Web Fullstack Developer — Ooredoo Tunisie

Tunis, Tunisia | July 2023 – August 2023 | Internship, 2 months

- Development of an SMS script management web application in Angular and Spring Boot: interfaces, forms and service integration; role-based security with Spring Security and PostgreSQL query optimisation.

Web Frontend Developer — Cloud Monsters

Tunis, Tunisia | June – July 2022 | Internship, 2 months

- Development of an interactive educational web platform in ReactJS: reading interfaces and gamification of children's books.
- User and content management through Firebase: authentication, real-time database and storage.

EDUCATION

Engineering Degree in Computer Science — ESPRIT (École Supérieure Privée d'Ingénierie et de Technologies)

Tunis, Tunisia | September 2019 – October 2024 | Graduated with distinction

PROJECTS

Full CI/CD pipeline (2023-2024) — Continuous integration and deployment with Jenkins, Docker, Grafana and Prometheus on an Angular / Spring Boot application: automated testing, containerisation and monitoring.

Artie, robot control (2023) — ReactJS web dashboard, Node.js backend and Flutter application controlling a drawing robot, with image-to-G-Code conversion.

Clothy (2022-2023) — SwiftUI / Kotlin mobile application: image recognition (Core ML) and real-time chat (WebSocket).

LANGUAGES

Arabic (native) | French (fluent,) | English (professional working proficiency)
